

TREX® & LEED® GREEN BUILDING RATING SYSTEM™

Trex decking and railing products contribute to LEED certifications on your commercial and residential projects.

LEED is a point-based system created in part by the U.S. Green Building Council (USGBC) to reward points to building projects that incorporate efficient and safe, eco-friendly products.

Trex decking products can add up to four points to a project – four points in the Materials and Resources category for being composed of up to 95% recycled materials.

Trex residential and commercial railing products also typically contribute to LEED certification points in the Materials and Resources category based on recycled aluminum, steel, stainless steel and glass content.

LEED-designated buildings (Silver, Gold or Platinum) tend to attract higher demand, premium rates and longer occupancy leases, thereby supporting continued and growing demand for products that can facilitate LEED designations.

MATERIALS & RESOURCES:

Credit 4.1	Recycled Content: 10%	1 point
Credit 4.2	Recycled Content: 20%	1 point
Credit 5.1	Regional Materials: 10%	1 point
Credit 5.2	Regional Materials: 20%	1 point

*Trex decking contains up to 95% recycled content
Trex products contribute up to four LEED points to any structure*

No trees have ever been cut down to make Trex products

Since our inception, we have upcycled over 5 billion pounds of waste polyethylene (PE) film

Almost 100% of factory waste is reclaimed

No harmful chemicals are used in Trex's eco-friendly manufacturing processes
